

TerraStar Building Products respects the global responsibility of protecting a sustainable environment for future generations. Our primary steel roofing and siding products are not only reinforced with a 40 year limited warranty; they are recyclable and offer over 20 **AKZO NOBEL** 1050 cool colour paint options.

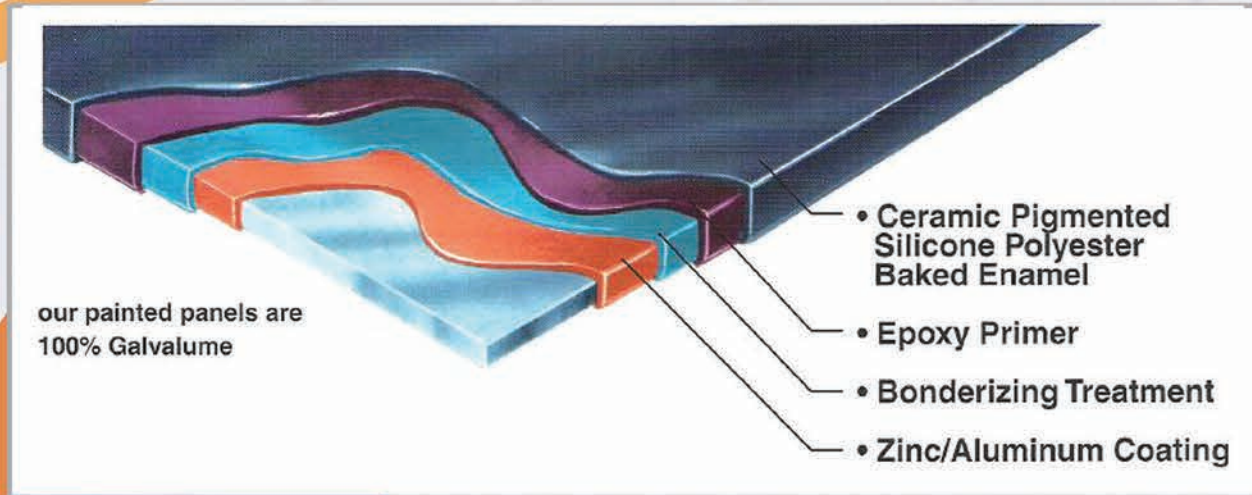

A cool roof reflects the sun's heat and releases absorbed radiation back into the atmosphere. This essentially makes a building greener by reducing utility costs relative to air conditioning, while lowering maintenance costs in support of extended roof longevity.

From a recycling perspective, metal cladding is not only great for your building; it's great for the environment, as it minimizes landfill site impacts compared to regular asphalt shingles.

G rib METAL PANEL INFORMATION

Our 3/4" rib with its anti-siphon feature gives you a weather-tight seal

QUALITY: G-Rib, our leading profile is one of the most popular and versatile contours in the industry, as it combines rigidity and strength with an attractive aesthetic appearance. Please see our catalogue, which features additional profiles, steel shingle options and product specifications.

DURABILITY: Constructed of 29 gauge high tensile steel, our ribbed panels are easy to install, sturdy and weather tight. Resistance to dents, plus minimal expansion / contraction properties confirm these panels as an excellent investment that will provide lasting protection and greater durability, while visually enhancing all types of structural designs.

SERVICE: Building materials can be shipped direct from our factory to you. Each steel shipment is carefully wrapped in banded bundles for protection in transit and at the job site. Our custom cut lengths up to 30 feet reduce or eliminate end laps; ensuring a tighter, stronger and more attractive building.
